Community of Practice

We provide a space for discussing relevant issues about specific managerial and operational challenges of RIs and CFs.

RitrainPlus Community of Practice is a private Facebook group for managers and operators of research infrastructures (RIs) and core facilities (CFs) of all career levels. With an open discussion space, sharing of relevant materials, targeted workshops and online webinars with presentations and interactive examples from experts, the RitrainPlus project addresses specific operational and managerial needs of managers and operators of RIs and CFs.

The goals

1.	develop, collect and share information and strategies to better support managers and operators of RIs and CFs,
2.	explore and share best practices related to specific operational and managerial needs of managers and operators of RIs and CFs,
3.	provide support to better address diverse needs of managers and operators of RIs and CFs, from strategic issues (gender equality, FAIR principles, implementation of GDPR, EOSC alignment etc.) to the development of mandatory policies, common operational issues, and necessary implementation methods.

First webinar

"Starting a new post in RI"

13th
May 2022

RitrainPlus project brings together research infrastructures (RIs), core facilities (CFs), business management Schools and European universities to transform the access and empowerment of human resources for national and international scientific facilities in Europe. See: <https://ritrainplus.eu/>
RitrainPlus project received funding from European Union's H2020 programme under grant agreement no.101008503.
